

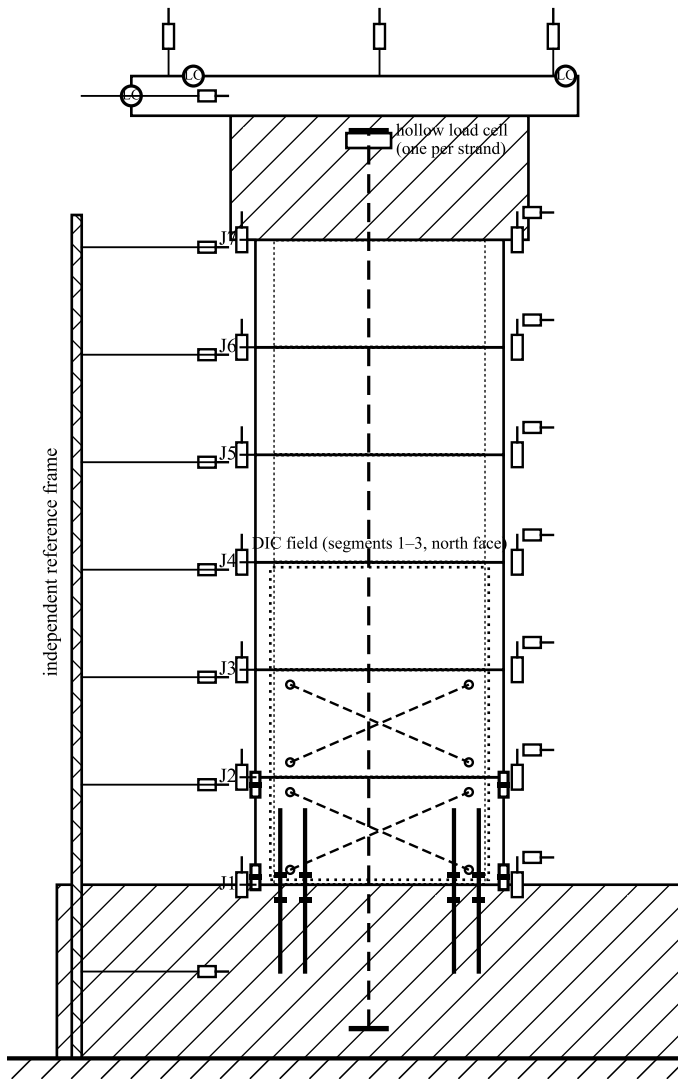

Fig. 4.2 Instrumentation layout on the PS specimen (elevation, bridge longitudinal direction)

Legend

- joint-opening LVDT, both faces, J1–J7 (14)
vertical LVDT symbol at each joint
- joint-sliding LVDT, J1–J7 (7)
horizontal LVDT symbol above each joint
- lateral profile LVDT, top of each segment (6)
from the independent reference frame
- interface LVDTs (5)
footing lateral, top lateral, three vertical on the loading beam
- tendon hollow load cells (2)
live-end anchors in the top block
- ED-bar strain gauges (16)
black rectangles on the unbonded length across J1
- toe strain gauges on corner angles (16)
both ends of segment 1, four corners
- diagonal LVDT rosettes (8)
dashed diagonals, segments 1 and 2
- DIC field
dotted outline, segments 1–3
- actuator load cells (3)
*All channels at 50 Hz on the laboratory time axis; see Table 4.2.
LC at the loading beam*
